4 Courses

Introduction to Concurrent Programming with GPUs

Introduction to Parallel Programming with CUDA

CUDA at Scale for the Enterprise

CUDA Advanced Libraries

JOHNS HOPKINS UNIVERSITY

Nov 17, 2024

Mohammad Talaat

has successfully completed the online, non-credit Specialization

GPU Programming

This specialization is intended for data scientists and software developers to create software that uses commonly available hardware. Students will be introduced to CUDA and libraries that allow for performing numerous computations in parallel and rapidly. Applications for these skills are machine learning, image/audio signal processing, and data processing.
